## **DETAILED ACTION**

### ***Election/Restrictions***

Claim 1 generic to a plurality of disclosed patentably distinct species comprising

I) claims 2-5 and 10-14 directed to including wherein said light-emitting module further comprising a package having a CAN-type, lead pins extending from said peltier (see fig. 1-5).

II) claims 6-14 directed to including wherein said light-emitting module further comprising a package having a box-shape, and a plurality of lead pins extending from respective side walls (see fig. 6-9).

Thus, each of the above group inventions requires a different search than that of other invention, the restriction is deemed proper.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. Steiner on 11/08/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2883

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
